

Magic Herb Dryer

Congratulations on your Magic Herb Dryer purchase.

The Magic Herb Dryer is very easy to operate.

1. Simply take your fully grown plants and clip them to the 1 of the 24 clips inside the dryer. You can clip 1 side of the plant on 1 clip and the other side of the plant on a 2nd clip so they hang. You can also clip 1 plant on each clip and let them hang upside down.
2. Make sure the Magic Herb Dryer is plugged in so the intake and outtake fans are working.
3. Come back in 7-10 days. If the branch of the plant is breakable, it means the plant has dried and is ready for removal. If not, come back in another 24 hours and try again.
